

Premiair Group Corona Virus (COVID-19) Prevention Policy

Based on World Health Organization (WHO) statements that corona virus is a pandemic disease and some country has implemented regulations that banned passanger with unfit health condition especially to passengers with body temperature equal to 37,5 Celcius or above, from entering its country. Indonesia have tighten the screening and security in order to prevent the spread of COVID-19 Virus on All airports, seaports, and public transportation facility.

In relation to the previously mention points, it is deemed necessary for us (Premiair Group) to support Indonesia's government program to prevent the spreading of the virus by ensuring that all colleagues, partners and Clients of Premiair Group are free from the risk of exposure to the COVID-19 Virus.

Therefore Premiair Group will perform early prevention measures by conducting body heat examination. To all Crew, Employees, and all clients for Premiair Group, the examination will be done in 3 locations which is every working day on the Premiair Group head office lobby, All activity in Premiair Executive Lounge, and B33 Office.

This examination will only took about 5-10 Seconds per person, by using remote thermal scanner, which will be done by appointed officers, while maintaining applicable privacy principles, ethic, and courteus. if examination result mention that the body temperature equal or reaches more than 37,5 Celcius, Premiair Group will apply below policy :

Client, Partners and Passenger

To all Client, Partners and passenger which after the examination shows that their body temperature equal or higher than 37,5 Celcius, we apologize that we cannot authorize all Client, Colleagues and passenger to enter our office area and All Premiair Group facility, based on above information, we reccomend the person to check to authorized doctor in order to get further examination and medical services in order to ensure personal health and safety, and the envionment.

Thus this policy "Premiair Group Corona Virus (COVID-19) Prevention Policy" was made, as an integral part of the national awareness program for COVID-19 Novel Corona Virus in Indonesia, and as part of company safety culture.
