e-Invoicing

Save time, minimize errors, and cut cost with a more efficient process

When your flight department utilizes e-Invoicing, the manual data process is replaced with a more efficient form of invoice data collection. Everyone's staff is overworked, so why waste valuable time with manual processes that can be easily automated? World Fuel's e-Invoice solution streamlines the invoice and coding process by electronically importing invoices into your accounting system, eliminating the process of manual data entry and providing GL coding that is tailored to your operation. You save valuable time and gain a better understanding of how and where you spend.

Key Advantages

- **Customized invoice feed** - Invoices are provided in a file format that can be automatically processed by your accounting systems so invoice detail data is imported with ease.

- **Accurate data** - Errors often arise when data is manually keyed in. Customized invoices can be easily uploaded to avoid translating PDF invoices, coding errors, and even duplicate payments caused by duplicate entries.

- **Understand and manage expenses** - With a faster process and data tailored to your company, you have the ability to analyze your spending data and better control expenses.

- **Faster processing** - Because data can be imported into your accounting system and your customized GL coding is automated, your operation saves time that was once wasted on manual data entry.

- **Lower cost** - The manual process of invoicing via emailed PDFs can cost up to $25 each time you manually process. Virtually eliminate this cost with World Fuel e-Invoices.

A simple process to get started

Implementing e-Invoicing gives your flight department access to a more efficient method of invoice data extraction.

World Fuel works with your accounting and technology organization to develop the right invoice file type that can be uploaded directly into your accounting package. Our standard data load options are weekly or monthly; however, other custom options are available. We handle translating our line item codes to yours, so information is seamlessly uploaded into your accounting system.

How does e-invoicing work?
Current invoicing process

RECEIVE	INPUT	CODING	APPROVAL	PAY THE INVOICE
PDF in email	Type in the data in accounting system	Transfer the invoice line items to your accounting product categories		

World Fuel Services
