

## myWorld App

### Your world just got easier

myWorld App consolidates flight planning, weather, airport search, trip, and fuel applications into a single environment. Backed by World Fuel Services' 24/7 operations team, myWorld App provides you with full access to the same data the World Fuel Trip Support team uses to manage your trip. myWorld App provides a user-friendly solution for your operation that covers the complete life cycle of your trip and includes an offline mode for use in the cockpit.

### Key advantages

- Calculate flight plans with accurate enroute times based on planned arrival or departure times and simplify route building with flight path and altitude information overlaid on navigation charts and procedures.
- Understand every detail with free access to full airport, handler, and country database details native to myWorld App.
- Quality control directly from the dashboard with user-friendly, color-coded indicators, including service and regulatory needs, flight planning, airspace, and weather hazards.
- Visualize the status of all your flight plans simultaneously with an easy-to-navigate dashboard and customize your flight plan formats with hundreds of output options.

## Keep your operations running smoothly and efficiently

The best of World Fuel Services' online flight planning (OFP), Trip View®, and myWorld Web have been joined together with leading aviation technologies to create a single app for all of your trip planning needs.

### Multiple Apps Bundled into One

- Fuel
- Weather
- Airport, handler, country, regulatory data
- File & Go
- Complex flight planning
- Electronic flight bag
- Trip View
- Services engine

### Single Application for Your World

- Worldwide regionalized enroute charting that works in online and offline modes
- Delivery of flight brief for fully-managed or self-service trips
- Drag and drop route rubberbanding to avoid conflict and weather areas
- Detailed overflight permit information and requirements
- eAPIS capability
- Customized flight plan formats
- Weather and navigation layers overlaid on interactive maps

### myWorld App Technology Contributors

- IBM
- The Weather Company
- Seattle Avionics
- Aircraft Performance Group
- NavBlue
- Mapbox
- SkyVector
- PDFTron
- AVfinity

- Integrated WSI weather graphics and vector content
- Download complete, customized interactive flight briefs prior to departure
- Quote and set up fuel at 3,000+ locations worldwide and order services directly in the app
- Free access to full planning information - weather, airport, country, permit requirements, and many other key trip data sources
- And more
