43 Air Elite Network Members Achieve Carbon Neutrality

March 18, 2021 – HOUSTON – Air Elite® by World Fuel (Air Elite) announces 43 member locations have become carbon-neutral. Working with Air Elite's network locations, World Fuel Services' affiliate, World Kinect Energy Services, analyzed the member's energy use and retired carbon offsets to compensate for their 2019 scope 1 and scope 2 carbon emissions. World Kinect Energy Services is a global leader in sustainability consulting, renewable energy and carbon solutions. Additionally, Air Elite and World Fuel Services has launched the same process to balance its 2020 scope 1 and scope 2 carbon emissions and has committed to becoming a sustainable network in 2020 and beyond. The 43 Air Elite member locations who have achieved carbon neutrality for 2019 include:

KSDL	Jet Aviation	Scottsdale, Arizona
KSNA	Clay Lacy Aviation	Orange County, California

Larry Wade, president, Golden Isles Aviation, and Air Elite board chair: "Sustainability is an important responsibility for our industry and is a growing desire for our customers. In response, Air Elite has started its sustainability journey. I am proud of the 43 Air Elite members who have stepped up to make their operations carbon-neutral. That's not an easy investment in this COVID era. Regardless, they have taken the first strides to set a path for Air Elite to be a carbon-neutral network, as well as supporting sustainability initiatives going forward."

Achieving carbon neutrality at 43 locations is a meaningful initial action in Air Elite's vision of becoming a sustainable network. In association with World Fuel, the network intends to expand the sustainability program by providing conservation programs, renewable energy and expanded offset options to decarbonize their operations.

Steve Drzymalla, senior vice president for business aviation bulk fuel, World Fuel Services, stated: "We applaud the decision of Air Elite's leadership to pursue carbon neutrality. With our solutions, we are in the position to help network members easily achieve their carbon reduction goals. With our first Sustainable Aviation Fuel shipments in 2014 to the addition of selling fuel bundled with offsets in our FBO software, World Fuel Services has and will continue to commit our resources to create a more sustainable future for our customers and the aviation industry."

About World Fuel Services Corporation

Headquartered in Miami, Florida, World Fuel Services is a global energy management company involved in providing energy procurement advisory services, supply fulfillment and transaction and payment management solutions to commercial and industrial customers, principally in the aviation, marine and land transportation industries.
